SUMMARY

Experienced Front-End Developer and User Interface Designer with a passion for building mobile-responsive websites, single-page web applications, and mobile applications using JavaScript.

SKILLS

Languages: HTML5, CSS3, SCSS, JavaScript, TypeScript

Frameworks and Libraries: NodeJS, ExpressJS, ReactJS, React Native, Redux, Bootstrap

Other Technologies: Visual Studio Code, MongoDB, Firebase, Git/Github, Expo, npm, RESTful APIs, Figma, WordPress

WORK EXPERIENCE

Front-End Web Developer
GrowthMed - Digital Marketing Agency   **August 2020 - June 2021, Los Angeles, CA**
· Develop responsive, high-quality websites representing our clients' businesses using WordPress, HTML, CSS, and jQuery.
· Collaborate with the Design and Customer Support teams to accurately implement the design mockup, perform QA, and apply changes requested by the client in under 2 weeks.
· Implement best practices regarding search engine optimization while developing and maintaining one of our 80+ websites, leading to an average 300% increase in our clients' lead generation.

Front-End Mobile Development Intern
Wistly - Delivery Service App Startup   **February 2020 - September 2020, San Diego, CA**
· Implemented the user flow of requesting a delivery driver by integrating multiple APIs from the Google Maps platform, resulting in the user easily being able to view autocompleted suggestions, a dynamic map, and accurate directions.
· Programmed the user's current location to be stored as a global state by using React-Redux and Redux Thunk, ensuring that the state is traceable and maintainable for frequent use throughout the codebase.

Front-End Web Development Intern
Juristerra - Legal and Medical Services Company   **June 2019 - August 2019, Irvine, CA**
· Converted their medical services website from being built with HTML to JavaScript and ReactJS in order to prepare for its transition to a web application in the future.
· Improved the ReactJS codebase of their legal services web application by refactoring code from past developers, effectively reducing the size and complexity of the UI components.

PERSONAL PROJECTS

Web Developer | Lill.link
TypeScript, ExpressJS, ReactJS, Redux, MongoDB, SCSS
· Designed a REST API that uses the npm packages valid-url and shortid to create a shorter link.
· Utilized ExpressJS and MongoDB to save the shortened link and redirect users to their original link.
· Connected the API to the ReactJS front-end by using Redux Thunk to send a POST request.

Web Developer | Ravenous.me
JavaScript, ReactJS, Yelp API
· Integrated the Google Places API and the Yelp API to display autocompleted suggestions based on location and keywords.
· Provide users with a list of businesses that match the user's search query, accompanied with address and contact details, while using ReactJS for the front-end.

EDUCATION

Bachelors of Science in Cognitive Science - Design and Interaction
University of California, San Diego · La Jolla, CA · 2020
